# AnanduKrishna J

Software Engineer – React JS Developer – Frontend Developer

Trivandrum, India | Phone: +91 81380 91435 | Email: mailme.anandukrishna@gmail.com
LinkedIn: linkedin.com/in/anandukrishnaj | GitHub: github.com/Anandu-krishna-j

## Professional Summary

Innovative **Software Engineer with 5.5 years of experience** building high-performance front-end applications using **React.js**. Strong expertise in **JavaScript, Redux Toolkit, Redux Saga, Context API, REST API integration, and performance optimization**. Proven ability to deliver scalable, maintainable UI solutions in agile teams, mentor junior developers, and improve user experience through clean architecture and reusable components.

## Technical Skills

**Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI (MUI), Context API

**State Management:** Redux Toolkit, Redux Saga, Redux Thunk

**Backend Exposure:** Python Flask (REST API), Django (Basics)

**Tools:** Git, GitHub, Postman, Thunder Client, VS Code, Chrome DevTools

**AI & Developer Tools:** ChatGPT, Claude AI, Codex, Anti Gravity, GitHub Copilot, Cursor AI

**Practices:** Agile/Scrum, Component Reusability, API Integration, Debugging, Code Review

## Professional Experience

**Software Engineer** **Aug 2023 – Present**
*Trois Infotech* *Trivandrum, India*

- Collaborated with a 5-member team to deliver 3+ front-end enhancements per sprint, meeting timelines consistently.
- Built scalable React applications using Redux Toolkit and Redux Saga to optimize state flow and performance.
- Designed responsive UI screens with MUI and Tailwind CSS, improving consistency and reducing development time.
- Mentored junior developers via reviews and best-practice guidance, improving overall quality.
- Researched and proposed new UI features and libraries to strengthen usability and scalability.
- Implemented reusable component libraries and UI patterns, reducing duplicate code and accelerating feature delivery.
- Improved application performance using memoization, lazy loading, and optimized API integration for faster page loads.

**React JS Developer** **Apr 2021 – Jul 2023**
*Devoskil Educare Pvt. Ltd.* *Trivandrum, India*

- Developed and delivered **2 production-ready platforms** using React.js, Context API, and Flask REST APIs.
- Integrated REST APIs and improved data handling between frontend and backend systems.
- Led a small team, providing technical direction and ensuring sprint deliverables on time.
- Enhanced UI responsiveness and maintainability through reusable components and clean architecture.

**Full Stack Developer Intern** **Oct 2020 – Mar 2021**
*Thomas Aerospace* *Trivandrum, India*

- Developed full-stack web modules using **Python Flask**, with responsive UIs in HTML/CSS/JavaScript.
- Created desktop applications using **Python Kivy** to support client-specific workflows.
- Handled database operations and optimized queries to improve application reliability and response time.
- Collaborated with cross-functional teams to debug, optimize, and deliver stable releases.
- Assisted in deploying Flask applications and maintaining version control using Git.

## Projects

**AmenEye – Video Management System** 2024

- Developed key UI modules using **React.js, Redux Toolkit, Redux Saga, REST APIs**.
- Implemented scalable flows for listing, filtering, playback, and access-controlled screens.
- Improved performance through memoization, pagination, and efficient API caching.

**Kerala Solid Waste Management Project (KSWMP)** 2024

- Built dashboards and reporting screens using **React.js, Redux Toolkit, Redux Saga**.
- Improved usability for large-scale data entry and tracking workflows.

**Surveillance AI – Real-time Monitoring UI** 2023

- Integrated AI monitoring outputs into dashboards with **React.js**.
- Designed responsive interfaces for alerts, camera feeds, and activity logs.

**HRMS – Human Resource Management System** 2023

- Developed employee lifecycle screens using **React.js, Tailwind CSS**.
- Created reusable forms, table components, and KPI views for HR reporting.

**Netflix Clone (Personal Project)** 2022

- Built Netflix-style UI using **React.js** with component-based architecture.
- Integrated movie APIs for trending, categories, and search results.
- Implemented responsive layout and smooth client-side navigation.

**Movers Management System (Personal Project)** 2021

- Created logistics workflow platform using **Python Django**.
- Implemented booking, tracking, customer management, and invoice generation.
- Ensured data accuracy using ORM validations and structured forms.

**School Management System (Personal Project)** 2020

- Developed school operations system using **HTML, CSS, JavaScript, Django**.
- Implemented student records, fee tracking, timetable, and staff workflows.
- Added search/filter, export reports, and role-specific dashboards.

**Employee Management System (Personal Project)** 2019

- Built a CRUD employee portal using **HTML, CSS, JavaScript, Django**.
- Implemented onboarding, attendance tracking, and role-based access.
- Designed relational database models and authentication with Django admin controls.

## Education

**B.Sc. Computer Science** **Jun 2017 – Mar 2020**
*University of Kerala* *Trivandrum, India*

**Higher Secondary** **Jun 2015 – Mar 2017**
*Govt Model BHSS* *Trivandrum, India*
